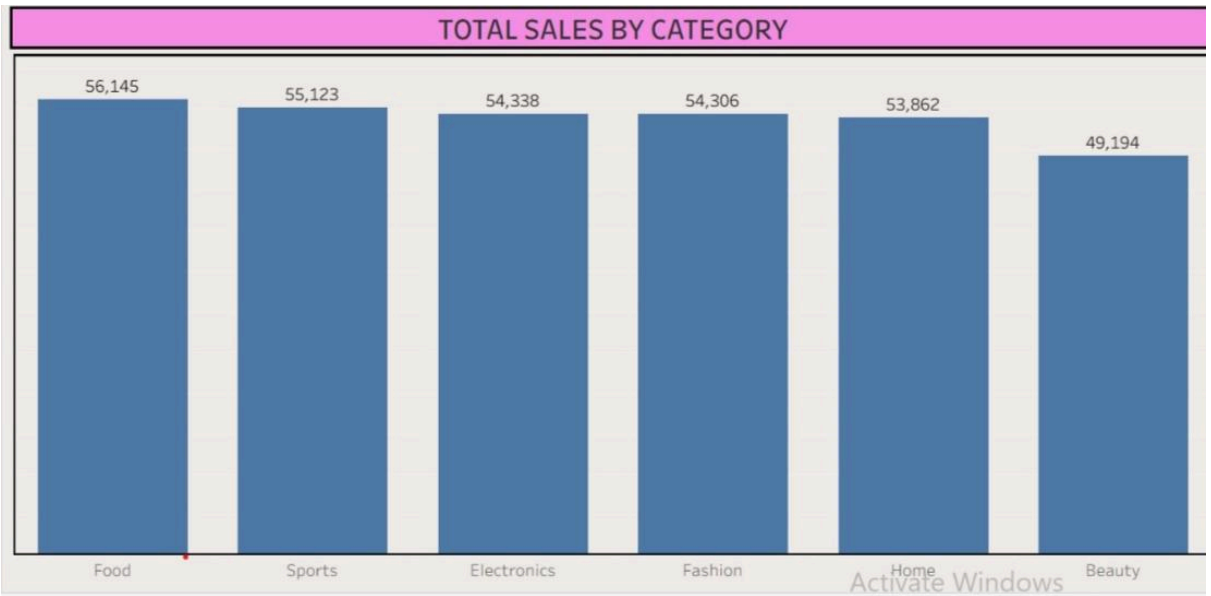
ASSIGNMENT 1

1. BAR CHART : Total sales by category

Purpose: A bar chart is used to represent data visually using rectangular bars. It helps compare values across different categories easily.

STEPS:

- Open Tableau Public.
- Connect your dataset (supermarket_sales).
- Drag CATEGORY → drop in Columns.
- Drag Total (Sales/Revenue) → drop in Rows.
- In Marks, select Bar.
- Drag SUM(Total) → drop on Label (to show numbers).
- Double-click the Title → type TOTAL SALES BY CATEGORY.
- (Optional) Drag Branch or Date → drop in Filters.
- Click Color → choose your preferred color.
- Save the sheet.

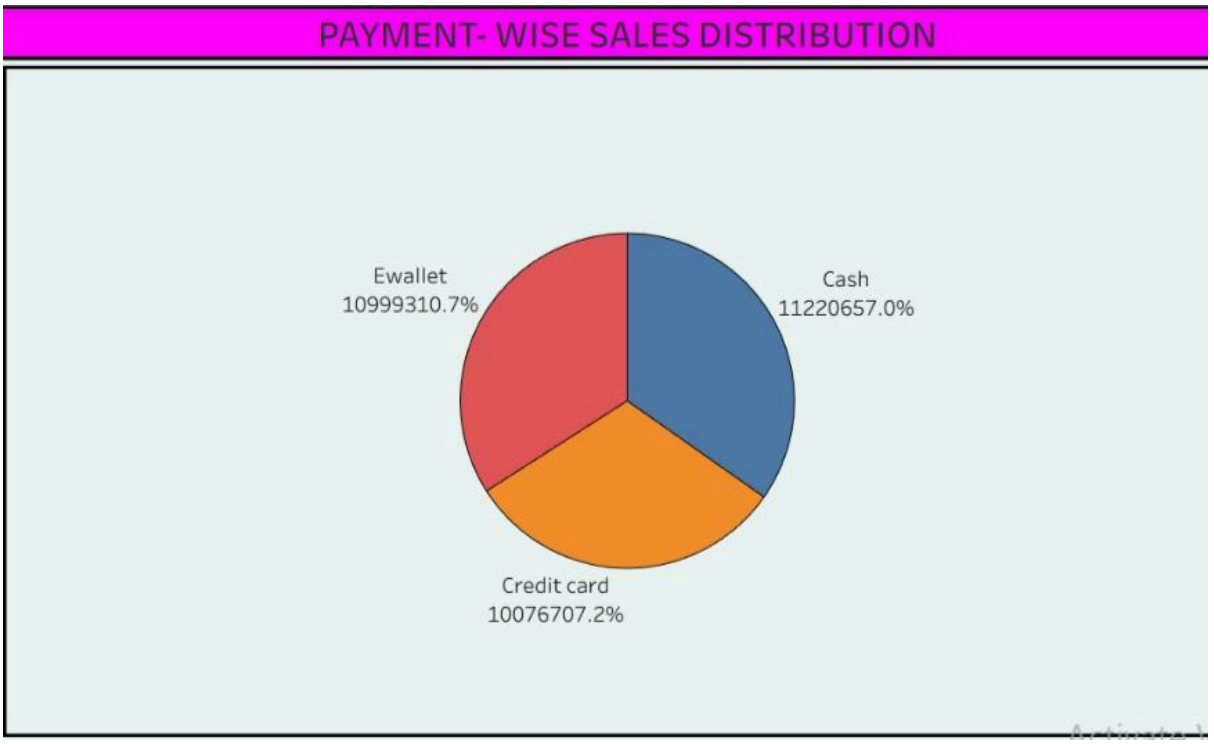


2. PIE CHART : PAYMENT- WISE SALES DISTRIBUTION

Purpose: A pie chart is used to represent data as parts of a whole. It shows how each category contributes to the total using slices of a circle.

Steps:

- Open Tableau Public.
- Drag Payment → drop on Marks → Color.
- Drag Payment → drop on Label.
- Drag Total (Sales) → drop on Angle.
- Drag Total (Sales) → drop on Label.
- In Marks, select Pie.
- Click Size → increase the pie size.
- Double-click Title → type PAYMENT-WISE SALES DISTRIBUTION.
- Save the sheet.



3. STACKED BAR CHART : QUANTITY DISTRIBUTION BY CATEGORY

Purpose: A stacked bar chart is used in branch-wise sales to compare total sales of each
branch and also see the contribution of different products or categories within that branch.

STEPS:

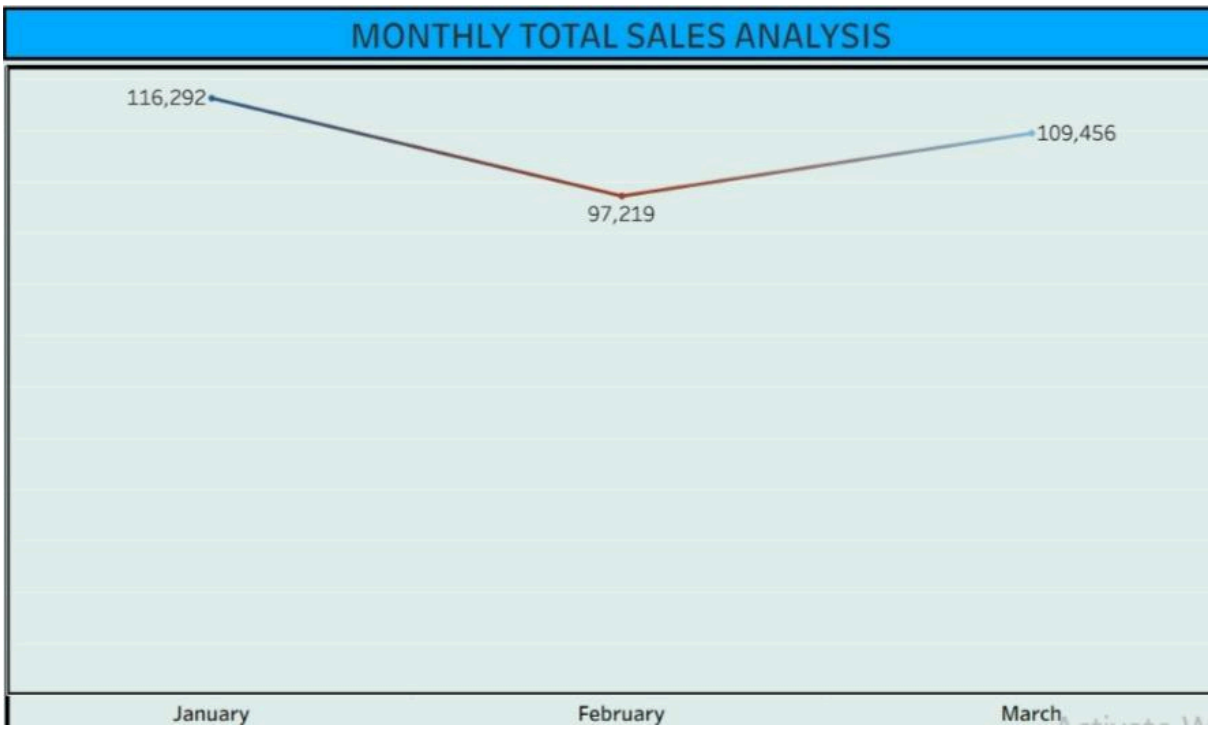
- Open Tableau Public.
- Drag Category → drop in Columns.
- Drag Quantity → drop in Rows.
- Drag Branch → drop on Color (Marks card).
- Make sure Marks type = Bar.
- Drag Quantity → drop on Label (to show numbers).
- Go to Analysis → Stack Marks → On.
- Double-click Title → type QUANTITY DISTRIBUTION BY CATEGORY.
- Save the sheet.

4.LINE CHART : MONTHLY TOTAL SALES BY ANALYSIS

Purpose: A line chart for monthly data is used to show how values change from month to
month across a year or any time period.

STEPS:

- Open Tableau Public.
- Drag Date → drop in Columns.
- Click the Date pill → select Month.
- Drag Total (Sales) → drop in Rows.
- In Marks, select Line.
- Drag Total (Sales) → drop on Label (to show values).
- (Optional) Drag Year(Date) → drop in Filters → select year (2019).
- Double-click Title → type MONTHLY TOTAL SALES ANALYSIS.
- Save the sheet.

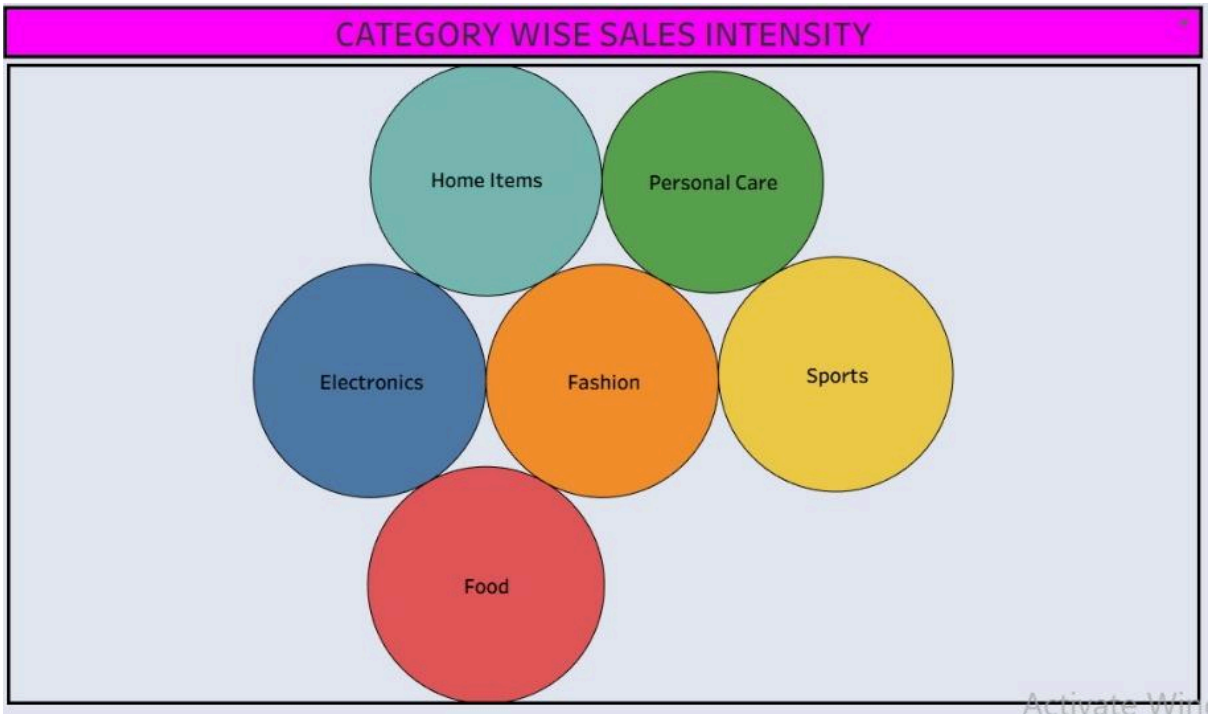


5. BUBBLE CHART : CATEGORY WISH SALES INTENSITY

Purpose:A Bubble Chart is used to visualize and compare product line performance using
circles (bubbles). Each bubble represents one product category.

Steps:

- Connect: Open Tableau Public and load supermarket_sales.
- Axis: Drag CATEGORY to Columns and REVENUE to Rows.
- Marks: Ensure Bar is selected in the Marks card.
- Labels: Drag REVENUE onto Label to show values.
- Sort: Click the Sort icon in the toolbar (descending).
- Color: Drag CATEGORY to Color for variety.
- Title: Double-click the title; rename to TOTAL SALES BY CATEGORY.
- Save: File > Save to Tableau Public.



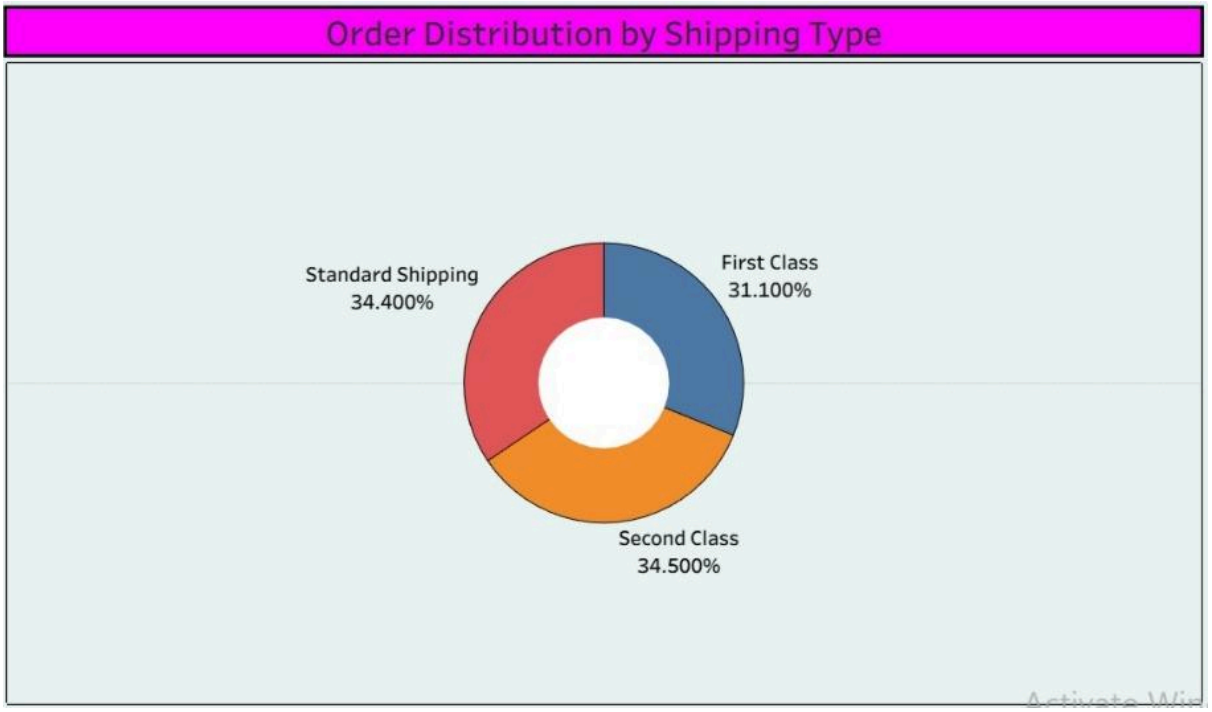
Assignment 2

1. DONUT CHART: Order distribution by shipping type

Purpose:To represent part-to-whole relationships by showing how each category contributes to the total value.

Steps:
Open Tableau Public → Click Connect → Text file / Excel → Load supermarket_sales dataset → Go to Sheet 1.

- Drag Category to Color (Marks card) then Drag Total to Angle and Drag Total → Label
- Change Marks type → Pie and For Create Dual Pie , Drag Number of Records → Rows (twice) Right-click second axis → Dual Axis
- Click 2nd Marks card (AVG(Number of Records)) and Remove Category from Color
- Change Color to White (or background Color) and Reduce Size Make it smaller
- Go to 2nd Marks card, Drag Number of Records to Label
- Edit label to Increase font size and Align Center
- Go to Format → Shading. Under Worksheet → Pane → Select Colour.
- Format Title, Double-click title give title as customer segment distribution and Click OK.
- Go to Format → Font → Title → Choose Colour , Then Go to borders and give borders

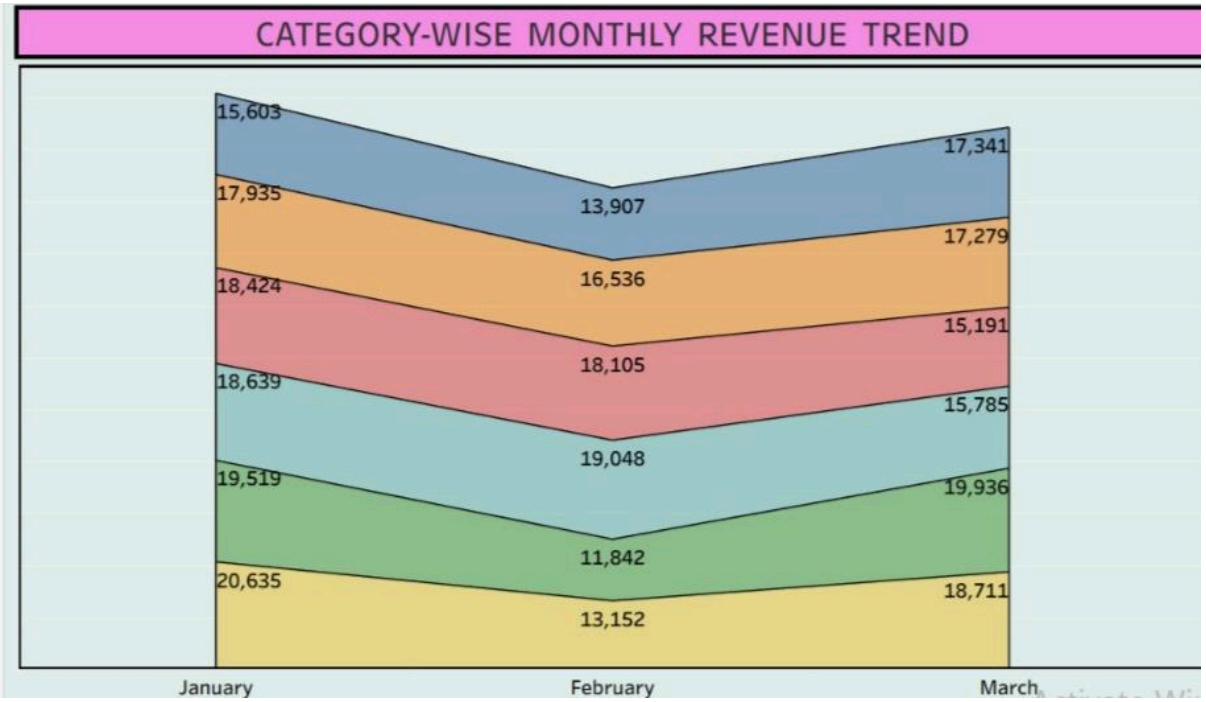


2. AREA CHART: Category -wise monthly revenue trend

Purpose:To show how different categories contribute to the total over time and compare their trends and growth.

Steps:

- Open Tableau Public → Click Connect → Text file / Excel → Load supermarket_sales dataset → Go to Sheet 2.
- Drag Date → Columns → Change to MONTH(Date)
- Drag Total → Rows
- Drag City → Rows (place before SUM(Total))
- Change Marks type → Area
- Drag Branch → Color (Marks card)
- Adjust Size if needed from Size option
- Go to Format → Shading. Under Worksheet → Pane → Select Colour.
- Format Title, Double-click title give title as growth coverage map and Click OK.
- Go to Format → Font → Title → Choose Colour , Then Go to borders and give borders



3. TEXT TABLE: Monthly revenue summary

Purpose:To display exact data values in a tabular format for detailed comparison and reporting.

Steps:Open Tableau Public → Click Connect → Text file / Excel → Load supermarket_sales dataset → Go to Sheet 3.

- From Data pane Drag Branch to Rows Then Drag Total → to Text (Marks card)
- Go to Marks dropdown Select Text
- Right-click SUM(Total) Click Format , Under Numbers Choose Currency (Custom) , Display Units Thousands (K)
- Go to Format → Shading. Under Worksheet → Pane → Select Colour.
- Format Title, Double-click title give title as data insight
- Go to Marks card → Change Marks type → Gantt Bar.
- Drag SUM(Gross Income) to Size
- Drag SUM(Gross Income) to Color.
- Go to Format → Shading. Under Worksheet → Pane → Select Colour.
- Format Title, Double-click title give title as profit flow dynamics and Click OK.
- Go to Format → Font → Title → Choose Colour.
- Then go to borders and give borders.

MONTHLY REVENUE SUMMARY

City	Product line	January	February	March	Grand Total
Mandalay	Electronic acces..	6.4K	6.4K	3.5K	16.2K
	Fashion accesso..	5.8K	5.8K	4.0K	15.6K

4. HIGHLIGHTED TABLE:Monthly revenue heatmap table

Purpose:To compare sales performance across product segments using color intensity to identify high and low values quickly.

Steps:

- Open Tableau Public → Click Connect → Text file / Excel → Load supermarket_sales dataset → Go to Sheet 4.
- Drag Product line to Columns Then Drag Branch to Rows.
- Drag Total to Color (Marks card) Next Drag Total Label
- Change Marks type Square (Or click Show Me → Highlight Table)
- Click Label → Show mark labels Format numbers to Currency
- Go to Format → Shading. Under Worksheet → Pane → Select Colour.
- Format Title, Double-click title give title as kpi highlight dashboard and Click OK.
- Go to Format → Font → Title → Choose Colour , Then Go to borders and give borders

MONTHLY REVENUE HEATMAP TABLE

Category	January	February	March	Grand Total
Beauty	780	695	867	2,343
Electronics	897	827	864	2,588
Fashion	921	905	760	2,586
Food	932	952	789	2,674
Home	976	592	997	2,565
Sports	1,032	658	936	2,625

5. WORD CLOUD: Sales contribution by product line

Purpose:To visualize text data by displaying frequently occurring words in larger and more prominent sizes.

Steps:

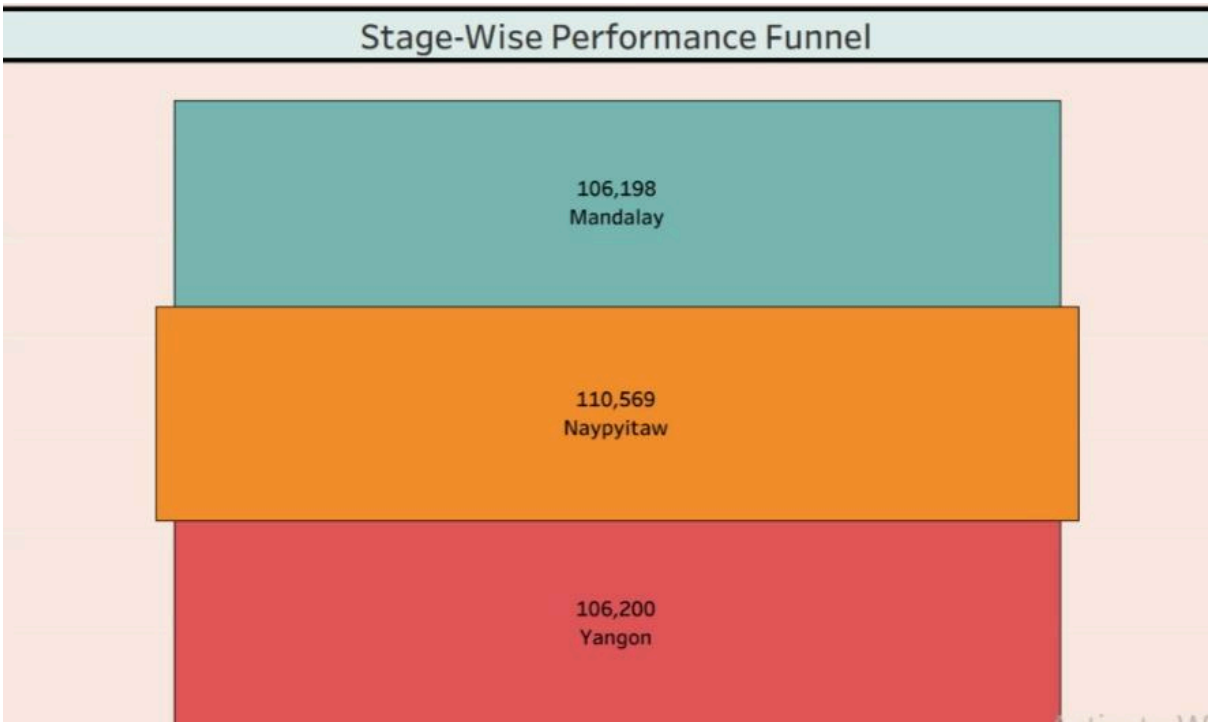
- Open Tableau Public → Click Connect → Text file / Excel → Load supermarket_sales dataset → Go to Sheet 5.
- Go to Marks card, Select Text.
- Drag Product line to Text (Marks card) Now product names appear as words.
- Drag Quantity (or Sales / Total) to Size.
- Drag Product line to Color (Now each word has a different color).
- Click Size , Move slider → Increase for big bold words.
- Go to Format → Shading. Under Worksheet → Pane → Select Colour.
- Format Title, Double-click title give title as data expression cloud and Click OK.
- Go to Format → Font → Title → Choose Colour
- Then Go to borders and give borders

6. FUNNEL CHART: stage -wise performance funnel

Purpose:A Funnel Chart is used to show how data moves through different stages and how the value decreases step-by-step.

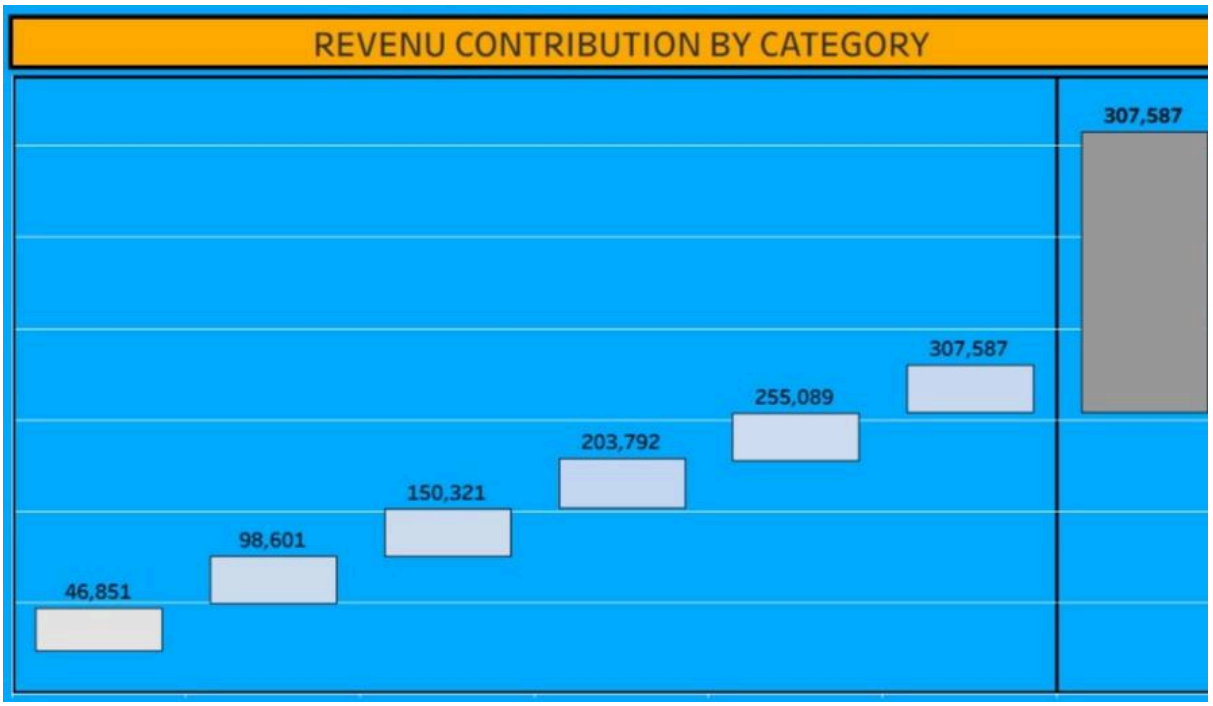
Steps:

- Open Tableau Public → Click Connect → Text file / Excel → Load supermarket_sales dataset → Go to Sheet 6.
- Drag Product line to Rows. Then Drag SUM(Total) Columns. Now Horizontal bars appear.
- Click Sort Descending icon
- Now the biggest bar on top (funnel shape order).
- Go to the Marks card, Select Bar.
- Drag Product line to Color. Now each bar gets a different color.
- Click Size, Drag slider for Increase width.
- Go to Format → Shading. Under Worksheet → Pane → Select Colour.
- Format Title, Double-click title give title as demand conversation funnel and Click OK.
- Go to Format → Font → Title → Choose Colour
- Then Go to borders and give borders



7. WATERFALLS: Revenue contribution by category
Purpose:

A Waterfall Chart shows how an initial value changes step-by-step due to increases and decreases. It explains how the final value is reached.

Steps:


- Open Tableau Public → Click Connect → Text file / Excel → Load supermarket_sales dataset → Go to Sheet 7.
- Drag Date to Columns and Change to MONTH(Date).
- Drag Gross Income to Rows.
- Right-click SUM(Gross Income) , Select Quick Table Calculation → Running Total.
- Go to Marks card → Change Marks type → Gantt Bar.
- Drag SUM(Gross Income) to Size
- Drag SUM(Gross Income) to Color.
- Go to Format → Shading. Under Worksheet → Pane → Select Colour.
- Format Title, Double-click title give title as profit flow dynamics and Click OK.
- Go to Format → Font → Title → Choose Colour.
- Then go to borders and give borders.
